3D Measurement Solutions

Marine Measurements have staff with two decades of experience providing Naval Architects, Marine Engineers, Government Agencies, National, International Sailing Authorities, with accurate data documentation.

We can quickly digitize your hull, deck and supper structure brining you a 3D model.

Projects range from racing hulls, pleasure craft, Tugs, and Navy ships.

- Laser scaning and point collection
- 3D modeling
- Reverse engineering
- Design verification
- Lost or missing drawings
